I began my voice over career as a radio/tv broadcast journalist in the US Army serving proudly from 1984-1989. I've worked in commercial radio, corporate multimedia production and did a 12 year stint as a video editor and media designer in a commercial production house.

Since October 2012 I've built a full time business as a professional VOA working from my home studio in a padded room in South Carolina connecting with hundreds of clients all over the world and love the freedom and adventure that being a self employed voice over artist brings!
